Phoenix Files

PREFACE

The science doctor is prepared to correct the common mistakes done as far as answering science questions is concerned

This book can be used by learners from primary three to primary seven. The language used in this book is simple to be understood by learners at the levels mentioned above.

Great care has been taken to make this book as comprehensive as possible, but at the same time to keep it within the scope of targeted users.

The author welcomes remarks, comments and suggestions from science teachers and the general public.

Together we can make science passable and enjoyable by learners

ABOUT THE AUTHOR

The author is a teacher of science with an experience of eight years teaching primary seven science.

He has taught in various schools in the country and currently is the head of science department at Katabarwa Memorial Primary School Rwampara District in Southwestern Uganda.

SPECIAL ACKNOWLEDGEMENT

I would like to extend my sincere appreciation to the administration of Katabarwa Memorial Primary School for their moral support and advice rendered to me towards the production of this work.

I would also wish to extend my appreciation to my fellow colleagues in the science department for their contribution towards the successful publication of this book.

I cannot forget to appreciate Mr. Muyambi Lauben science teacher at Hillside Nalya for his advice towards the publication of this book.

I also wish to extend my thanks to LBE stationers for typesetting and design. My appreciation also goes to BEAT stationers for their printing services.

DEDICATION

I dedicate this piece of work to my mother BULASIDIA TUKAHIRWA and my father the late ASIIMWE WILSON KAMARA for her tremendous efforts to ensure that I get education. May the Almighty God bless them abundantly.

LET'S PASS SCIENCE

COMMON MIST...NEWLY-1.docx

Phoenix Files

1. What is germination?

Correct response.

Germination is the growing of the seed embryo into a seedling.

Wrong response.

Germination is the growing of a seed into a seedling.

Note: During germination, it the plumule and the radical which develop but not the whole seed.

2. Give one reason why we boil water for drinking.

Edit

Search

Save as

Share

COMMON MIST...NEWLY-1.docx

Phoenix Files

Correct response.

To kill germs.

Wrong response.

- To avoid germs.
- To prevent diseases.

NOTE: The heat involved in boiling water denatures germs hence killing them.

Germs cannot be avoided because we cannot avoid what we can't see.

3. What are biological changes?

Biological changes are changes which take place in the life of living things.

Wrong response.

Biological changes are changes which take place in living things.

Phoenix Files

4. Where does conception take place in the woman's reproductive system?

Correct response.

In the oviduct.

Wrong response.

In the uterus.

Note: Conception occurs immediately after fertilization, that's why it occurs in the oviduct.

5. State the importance of suckers to a tapeworm.

Correct response

They attach the tapeworm to the walls of small intestines

Wrong response.

Edit

Search

Save as

Share

COMMON MIST...NEWLY-1.docx

Phoenix Files

Wrong response.

THE SPARK PUBLISHERS
SCIENCE DOCTOR
Tel 0775719841/ 0755322865

Suckers absorb digested food.

Note: Tape worms do not absorb digested food using suckers. They feed by absorbing digested food through the surface of their skin by diffusion

6. What is soil erosion?

Soil erosion is the removal of top soil by its agents.

Wrong response.

Soil erosion is the washing away of top soil; from one place to another by its agents.

Note: The word washing away is not scientific.

8. How do legumes improve soil fertility add nitrogen in the soil.

Correct response

Legumes add nitrogen in the soil.

Wrong response.

Legumes add nutrients in the soil.

Note: Legumes add nitrogen to the soil which is converted into nitrates to improve soil fertility.

9. What causes pellagra?

Correct response.

Lack of vitamin B₃ in one's

Edit

Search

Save as

Share

COMMON MIST...NEWLY-1.docx

Phoenix Files

Wrong response.

Lack of vitamin B₂ in one's diet.

Note: Vitamin B₂ deficiency does not cause pellagra. It causes riboflavin, swollen throat, blurred vision and depression.

10. State the use of a switch in an electric circuit

Correct response.

Switch completes or breaks a circuit at one's will.

Wrong response.

Switch completes and break the circuit at one's will.

Note: Using and means that the switch completes and break the circuit at once.

11. How do tapeworms obtain their food?

Edit

COMMON MIST...NEWLY-1.docx

Phoenix Files

11. How do tapeworms obtain their food?

Correct response.

THE SPARK PUBLISHERS
SCIENCE DOCTOR
Tel 0775719841/ 0755322865

By diffusion of digested food through their skins

Wrong response.

By absorbing digested food using suckers.

Note: Tapeworms do not use their suckers to absorb digested food. Digested food is absorbed through their skins by diffusion.

12. What type of change occurs when an egg breaks?

Correct response.

Edit

Search

Save as

Share

COMMON MIST...NEWLY-1.docx

Phoenix Files

12. What type of change occurs when an egg breaks?

Correct response.

Physical change.

Wrong response.

Chemical change.

Note: When an egg breaks, non-new sub stance is formed.

Also, the physical properties of an egg do not change

13. What is a weed?

Correct response.

THE SPARK PUBLISHERS

Share

COMMON MIST...NEWLY-1.docx

Phoenix Files

16. How is cattle keeping important to a crop farmer?

A farmer gets droppings from cattle which are used in gardens as manure.

Wrong response.

A farmer gets manure from cattle.

THE SPARK PUBLISHERS
SCIENCE DOCTOR
Tel 0775719841/ 0755322865

Note: Manure from cattle is obtained after decomposition. So we get droppings from cattle but not manure.

17. How do hookworm's enter the human body?

Correct response.

- Through penetration into bare feet.

Edit

Search

Save as

Share

COMMON MIST...NEWLY-1.docx

Phoenix Files

17. How do hookworm's entre the human body?

Correct response.

- Through penetration into bare feet.
- Through walking bare footed.

Wrong response.

- Through bare foot.
- Through walking bare feeted.

Note: It is important to mark the correct spelling of the word **bare**. Also we don't walk bare feeted but bare footed.

18. How do tapeworm enter the human body?

Correct response.

- Through eating under cooked meat, pork or fish.

Wrong response.

- Through eating a half cooked meat.
- Through eating half cooked food.
- Through eating un cooked meat.

~~Note: we should not use the word half because it means part of a comet~~

Edit

19. What is soil capillarity?

soil capillarity is the ability of the soil to allow water drain through it from bottom layers to top layers.

Wrong response.

Soil capillarity is the ability of the soil to hold water for long.

Edit

Search

Save as

Share

COMMON MIST...NEWLY-1.docx

Phoenix Files

19. What is soil capillarity?

soil capillarity is the ability of the soil to allow water drain through it from bottom layers to top layers.

Wrong response.

Soil capillarity is the ability of the soil to hold water for long.

Note: Clay soil has the highest capillarity because it allows more water to drain through it easily from the bottom to the top.

Sand soil; has the lowest or poorest capillarity because it allows less water to drain through it easily from bottom to top.

20. Mention any three system of keeping poultry.

Correct response.

- ✓ Fold system.
- ✓ Battery system.
- ✓ Free range system
- ✓ Deep litter system

Wrong responses.

- ✓ Battery cage system
- ✓ Fold pen system

Edit

Search

Save as

Share

COMMON MIST...NEWLY-1.docx

Phoenix Files

to mean pen.

It is also wrong to say battery cage system because battery also means cage

21. Give any two breeds of cattle kept in Uganda.

Correct responses.

- Friesian
- Jersey
- Hereford
- East African zebu
- etc.

Wrong responses.

- Exotic breeds
- Local breeds
- Cross breeds

Note: a breed means a group of animals having specific characteristics and origin so. Exotic breeds, local breeds and cross breeds don't have specific characteristics and same origin

COMMON MIST...NEWLY-1.docx

Phoenix Files

Wrong responses.

A switch completes and breaks the circuit at one's will.

Note: A switch does not complete or break the circuit at once. This is a reason why and is discouraged.

25. What is soil profile?

Soil profile is the arrangement of soil layers from top to bottom.

Wrong response.

Soil profile is the vertical arrangement of soil layers from top to bottom.

Note: The word vertical means from top to bottom. So having the two words in the answer is repetition.

26. Why breast milk is called a complete food?

Correct response.

Breast milk contains all food values.

Edit

Search

Save as

Share

COMMON MIST...NEWLY-1.docx

Phoenix Files

Breast milk contains all food values.

Wrong response.

THE SPARK PUBLISHERS

SCIENCE DOCTOR

Tel 0775719841/ 0755322865

Breast milk contains almost all food values except iron.

Note: Iron lacking in breast milk is not a food value but a food element under mineral salts.

27. How can we prevent kwashiorkor in children?

By feeding children on food rich in proteins.

Wrong response.

By feeding children on proteins.

Note: We don't directly feed on proteins but on food stuffs rich in proteins.

Edit

COMMON MIST...NEWLY-1.docx

Phoenix Files

42. Give any two blood cells.

- Correct response
- Red blood cells.
- White blood.
- Platelets.

Wrong response.

Plasma.

Note: Plasma is just a liquid part of blood.

No cells make up plasma.

-Therefore, plasma is only a component of blood but not a blood cell.

43. Give any one characteristic common to all dicotyledonous seeds.

All dicotyledonous seeds have tap root system

All dicotyledonous seeds have two cotyledons

Wrong response.

- All dicotyledonous seeds undergo epigeal germination
- All dicotyledonous seeds have parallel leaf venation

Note Not all dicotyledonous seeds undergo epigeal germination

For example Peas, and simsim are dicotyledonous seeds but undergo hypogeal germination

Seeds do not have veins therefore no venation

44. What is a fracture?

Edit

Search

Save as

COMMON MIST...NEWLY-1.docx

Phoenix Files

44. What is a fracture?

Correct response.

A fracture is a broken or cracked bone in the body

THE SPARK PUBLISHERS

SCIENCE DOCTOR

Tel 0775719841/ 0755322865

Wrong response.

A fracture is a broken bone in the body

Note not all bones break. Some crack while others bend eg green stick fracture in young children

45. Mention any two types of poultry

Correct responses.

- ✓ Chicken
- ✓ Turkeys
- ✓ Ducks
- ✓ Pigeons
- ✓ Doves

etc

Edit

Search

Save as

Share

COMMON MIST...NEWLY-1.docx

Phoenix Files

Wrong responses.

- ✓ Layers
- ✓ Broilers
- ✓ Dual purpose

Note: Poultry refers to all kinds of domestic birds

Layers, broilers and dual purpose are not types of poultry but types of chicken

A type of chicken means a class of chicken kept for a specific purpose. So different types of chickens are kept for specific purposes eg,

Layers – For egg production

Broilers – For meat product

Dual-purpose – for both meat and egg production.

46. Why should married couples go together for gonorrhea / syphilis treatment?

Correct response.

THE SPARK PUBLISHERS

SCIENCE DOCTOR

Tel 0775719841/ 0755322865

To prevent re-infection.

Wrong response.

Edit

COMMON MIST...NEWLY-1.docx

Phoenix Files

It prevents heat loss by conduction and convection.

Wrong responses.

It prevents heat loss by radiation.

Note: A vacuum does not conduct heat because it lacks matter.

The vacuum prevents heat loss by conduction because it does not conduct heat because there is no solid.

The vacuum prevents heat loss by convection because there is neither a liquid nor a gas to transmit heat

N.B: Heat travels through a vacuum by radiation.

This is because heat transfer by radiation does not need a medium of transmission.

62. What is the main cause of cannibalism among poultry?

Correct responses.

Prolapse

Wrong responses.

Poor feeding.

Over crowding birds in a poultry house.

Note: prolapsed is a condition in which a hen's vent or cloaca is pushed outside its body.

63. Where in the human digestive system does absorption of digested food take place?

Edit

Search

Save as

67. Mention two methods of heat transfer in matter.

Correct responses.

- Conduction
- Convection

Wrong responses.

Radiation

Note: Radiation is the transfer of heat in a vacuum and space. It is not a method of heat transfer in matter.

N.B: The above question is different from this below.

Name any two methods of heat transfer.

- Conduction
- Convection
- Radiation

In this question, there isn't any specification.

It is an open question

68. Why is water called a universal solvent.

Correct responses.

It dissolves almost all solutes.

Wrong responses.

It dissolves all solutes.

Note: water does not all solutes that's why the word almost is used

69. Why is the handle of a frying pan made of wood?

Correct responses.

To prevent the hands of the user from getting burnt.

Wrong responses.

Wood is a bad conduction of heat.

70. Identify the disorder of the digestive system that results from improper chewing of food.

Correct responses.

Indigestion

Wrong responses.

Choking.

Note: choking is not the disorder of the digestive system. It only affects the respiratory system

71. Why is a sugar cane not referred to as a stem tuber?

73. Give any three characteristics of insect pollinated flowers.

Correct responses

- ✈ They have brightly coloured petals.
- ✈ They are scented.
- ✈ They produce less pollen grains
- ✈ They produce nectar.

Wrong response.

Their stigma is longer/taller than the anthers.

Their stigma is never long. What is long is the style but not the stigma.

The anther head is never long what is long is the filament.

N.B: It is correct to say insect pollinated flowers have longer styles than filaments.

74. How are scavenger birds important in the environment.

Correct response

They help to clean the environment by feeding on the carrion.

THE SPARK PUBLISHERS

SCIENCE DOCTOR

Tel 0775719841/ 0755322865

They help to clean the environment by feeding on decaying flesh of dead animals,

Wrong response.

Wrong response

Vaccines are medical substances introduced into the body to fight against diseases causing germs

Note: vaccines do not fight against diseases causing germs. They induce the body to produce antibodies that fight against diseases causing germs

138. Why is BCG given to babies at birth?

Correct response

Babies are born without maternal immunity against tuberculosis

Wrong response

To prevent them from tuberculosis

Note: At birth babies are born with no maternal immunity to protect them from tuberculosis

139. Why are pregnant women given tetanus toxoid vaccine?

Correct response

To protect the mother and her unborn baby from tetanus infection

Wrong response

To protect the mother from tetanus infection at birth

Note: Tetanus toxoid vaccine does not protect only the mother, it even protects the unborn baby from getting infected with tetanus at birth.

140. How does a scorpion reproduce?

Phoenix Files

141. State the importance of bacteria in the environment

Correct response

Bacteria help in decomposition of organic matter

Bacteria help in fermentation of alcohol

Bacterial help in fermentation of milk

Wrong response

Bacteria help in ripening of fruits

Note: Ripening of fruits is done by a hormone called ethylene but not bacteria

142. Identify the germ that causes HIV/AIDS

Correct response

Human immunodeficiency virus

Wrong response

Human immune virus

Note: The word immunodeficiency is one word

143 How are strong sharp curved beaks important to birds of prey

Correct response

They help birds of prey to tear flesh

Wrong response

They help birds of prey to tear the prey

Edit

143 How are strong sharp curved beaks important to birds of prey

Correct response

They help birds of prey to tear flesh

Wrong response

They help birds of prey to tear the prey

**THE SPARK PUBLISHERS****SCIENCE DOCTOR****Tel 0775719841/ 0755322865**

Note: The prey is not torn by the strong sharp curved beak but killed and held by strong sharp curved talons

144 Why are the lungs referred to as respiratory organs.

Correct response

They allow oxygen into the body for respiration

Wrong response

Lungs are used for breathing

Note: The question requires a learner to give the main importance of lungs during respiration

145. Where does respiration take place?

Correct response

Edit

Search

COMMON MIST...NEWLY-1.docx

Phoenix Files

145. Where does respiration take place?

Correct response

In living body cells

Wrong response

In lungs

Note: Lungs are respiratory organs but not areas where respiration takes place

146. State the importance of chlorophyll during photosynthesis

Correct response

Chlorophyll traps sunlight energy

Wrong response

Chlorophyll helps plants to make their own food

Note: The question requires one to explain how chlorophyll helps plants to make their own food

147. What is breathing?

Correct response

THE SPARK PUBLISHERS

SCIENCE DOCTOR

Tel 0775719841/ 0755322865

Breathing is the taking of air in and out of the lungs

Edit

COMMON MIST...NEWLY-1.docx

Phoenix Files

Breathing is the taking of air in and out of the lungs

Wrong response

Breathing is the breathing of oxygen

Note: The air we breathe in and out contains all the components of air but not only oxygen

148. Name the chemical method of controlling mosquitoes

Correct response

Powering oil on top of stagnant water

Wrong response

Oiling stagnant water

Note: Water cannot be oiled oils poured

149 How are prop roots important to a maize grain ?

Correct response

Prop roots give extra support to a maize plant

Wrong response

Prop roots absorb water and mineral salts from the soil

Note: Prop roots appear at the flowering stage to give extra support to a plant

150. Name the addictive drug found in tobacco

Correct response

Nicotine

COMMON MIST...NEWLY-1.docx

Phoenix Files

152. Why is distilled water not safe for drinking

Correct response

It does not contain mineral salts

Wrong response

It contains germs

Note: Distillation boils the water which kills germs but also removes the mineral salts which are essential to human health

153. Why is the filament in an electric bulb coiled?

Correct response

To increase electrical resistance

Wrong response

To reduce electric resistance

Note: The more the number of coils, the greater the resistance and the more the heat produced.

154. Which form of electricity is stored in the dry cells?

Correct response

Chemical energy

Wrong response

COMMON MIST...NEWLY-1.docx

Phoenix Files

Tuberculosis of the spine/bones

Wrong response

Tuberculosis

Note: There are two forms of tuberculosis the one that affects the lungs and the other one that affects the back bone. So tuberculosis of the spine affects the skeleton

165 What is electricity?

Correct response

Electricity is the form of energy which involves electric charges

Wrong response

Electricity is the form of energy produced by the flow of electrons

Note: The above definition brings in contradiction between current electricity and static electricity

Current electricity is defined as the type of electricity which involves the flow of electrons while static electricity is defined as the type of electricity which does not involve the flow of electrons

So the first definition is correct because both current and static electricity have charges.
