Mistakes made by teachers while marking science;

- ✓Some trs don't mind about the grammar/tense used in the sentence by the learner since it is not English language
- ✓Collecting spellings of the learners and award a tick.
- ✓Marking calculation without the formula and units since it is not mathematics.
- ✓Some don't mind about the neatness of the drawings since it is not fine art.

ADVICE TO TRS;

- ✓Emphasis should be put on hand writing and spellings of the words used by learners while marking.
- ✓Don't correct errors made by the learner and award a mark (tick).Let the learner know that he/she should correct errors /mistakes for him or herself.
- ✓Don't mark any calculation of science without the formula and units.
- ✓Learners should not use arrow heads when labeling diagrams. Arrows in science represent Pressure, flow of energy, heat etc.
- ✓When labeling diagrams lines should be straight and not intersecting each other.
- ✓All drawings should be done in a pencil.
- ✓Learners should always begin with capital letters and punctuate their work correctly.

- ✓When writing the word or sentence should begin from the margin not in the middle of the line/space provided
- ✓Encourage the use of short and precise answers.
- ✓Follow the current syllabus and keep on making more research ,things keeps on changing and most of the definitions and answer approach in most of the text books are outdated.
