GREENHILL ACADEMY

MATHEMATICS LESSON NOTES FOR PRIMARY FIVE (TERM 1)

TERM 1 TOPICS

- **SET CONCEPTS**
- **NUMERATION SYSTEMS**
- **OPERATION ON NUMBERS**
- **NUMBER BASES**
- **FINITE SYSTEM**
- **NUMBER PATTERNS**
- **FRACTION**

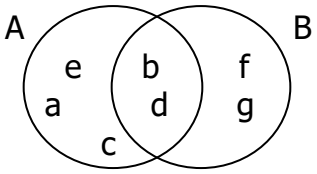

WK. 1: Lesson 1 & 2

SETS

Review of P.4 work on sets

1. Draw set symbols for:
   a) Subset of
   b) b) union set
   c) Intersection set
   d) Null set
   e) Equal set
   f) Non equivalent set
   g) Equivalent set
   h) Non equivalent set.

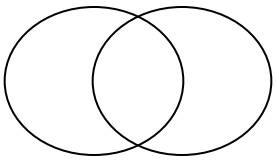

2. Give that Set A = { 1, 2, 3, 4}
   B = { 5, 6, 7, 8}
   C = { 1, 3, 4, 2} and
   D = { a, e, I, o, u}
   a) Describe set A
   b) Using symbols show the relationship between sets
      (i) A and C
      (ii) B and C
      (iii) A and D.
3. Draw a venn diagram and shade the regions below.
   (i) $A \cap B$ (ii) $P \cup Q$ (iii) F – G (iv) G – F
4. Study the Venn diagram below and answer the questions that follow.

   a) Find n(A – B) b) n(B – A)
   c) Write down all members of
      i) Set A ii) Set B iii) Set $A \cap B$ iv) Find $n(A \cup B)$

5. Given that X = { 0, 1, 2, 3, 4} and Y = { 1, 3, 6, 9, 12}

   a) Represent the two sets on the Venn diagram.

   b) From the venn diagram, find

      (i) $X \cap Y$ (ii) $n(X \cup Y)$ (iii) $n(Y - X)$

WK. 1: Lesson 3

Complement of sets

Complement of a set means a set of members not in the given set.

OR

Elements in the universal set but not in the given set.

Example

Given that; P = {4, 3, 6, 7, 9}

and

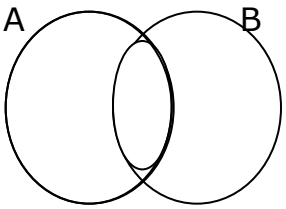

Q = {1, 2, 3, 5, 7}

Write down members in P' (Complement of set P)

P' = {1, 2, 3} * Find $n(P \cap Q)$

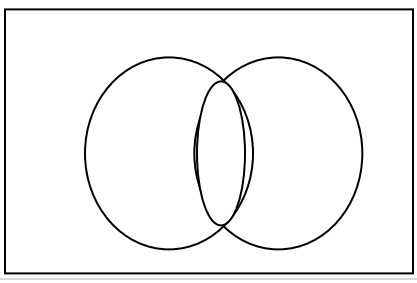

Note: The symbol for complement of a set

Shading regions for complement of a set

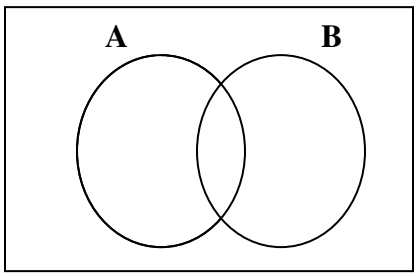

= ($A \cap B$)'

$A \cap B$ the complement

= (AnB)'

Draw and shade (A∪B)'

= (A∪B)'

ACTIVITY

Mk Book 6 page 8 - 10 primary school Maths book 15 pg 7 – 8.

Fountain Primary Mtc bk. 6 pg 8 – 10

WK. 1: Lesson 4

SUBSETS

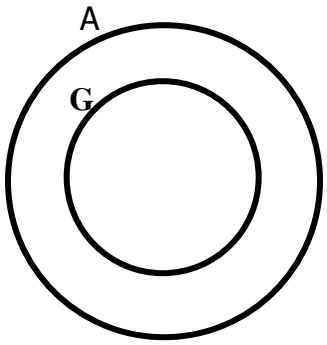

A subset is a small set got from a big set.

The bigger set from which a subset is got is called a Universal set or Super set.

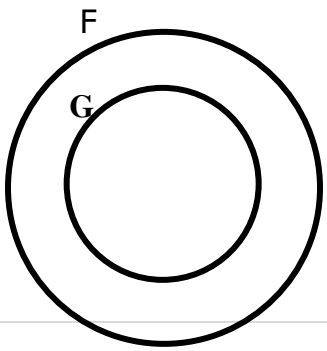

The symbol for subset is **C.**

The symbol for not a subset is $\not\subset$. The symbol for Universal set is ξ.

1. Draw a venn diagram to show that all goats (G) are Animals (A)

2. Draw a venn diagram to show that girls are a subset of females

3. Given that set Q = {a, b, c}. List down all the subsets in set Q.

{a}, {b}, {c}

{ab}, {ac}, {bc}

{}, {abc} $\Longrightarrow$ Subsets $\Longrightarrow$ 8 in number.

N.B The empty set and the set itself (universal) are subsets of every set.

4. By calculating, find the number of subsets in set Z if Z = {7, 5, 3}

No. of subsets = 2^n where n represents the number of elements in the given set.

$\therefore$ set Z has 3 elements

$\therefore$ $n(c) = 2^n$

$= 2^3$

$= 2 \times 2 \times 2$

$= 4 \times 2$

$= 8$ subsets

Ref : Mk. Bk 7 Pg 2

WK. 1: Lesson 5

PROPER SUBSETS

These are all subsets of a given set excluding the given set itself. (Universal set)

Set P = {1, 2, 3}. Find by listing all the proper subsets of set P.

These are :-

{ }, {1}, {2}, {3}

{1, 2}, {1, 3}, {2, 3}

$\Longrightarrow$ 7 proper subsets.

ii) By calculation

Number of proper subsets

$= 2^n - 1$

$= 2^3 - 1$

$= (2 \times 2 \times 2) - 1$

$= 8 - 1$

$= 7$

REF: Mk bk 7 pg 2 – 3

WK. 1: Lesson 6

APPLICATION OF SETS

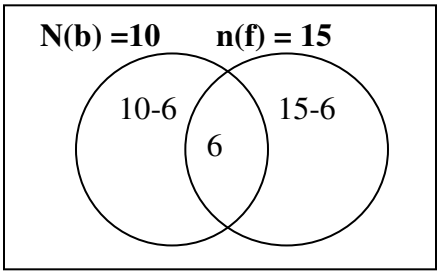

In a group of swimmers, 15 do free style (f) 10 do backstroke (b) and 6 do both

n(f) = 15

n(b) = 10

$n(f \cap B) = 6$

a) Represent the above information on a venn diagram.

b) How many swimmers swim only back stroke?

10 - 6

4 swimmers

c) How many do only free style?

15 – 6

19 swimmers

d) How many swimmers are in that group?

(10 + 6) + 6 + (15 – 6)

4 + 6 + 9

10 + 9

= 19 swimmers

e) How many swim only one style?

Backstroke only + free style

(10 – 6) + 15 – 6

4 + 9

= 13 swimmers

2. Given that n(A) = 15 n(B) = 25 $n(A \cap B) = 5$

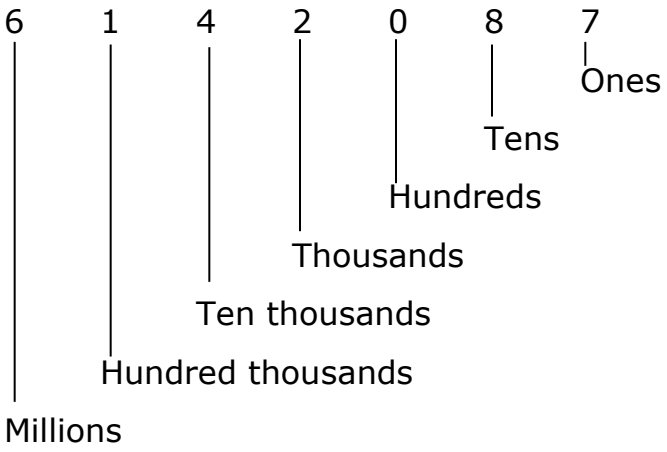

a) Represent the above information on a venn diagram

REF: Mk book 6 pg 29 – 30

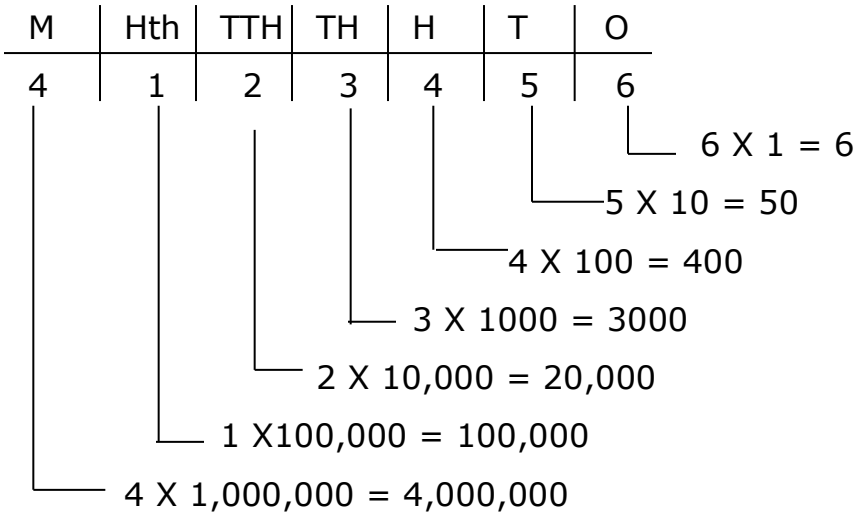

WK. 2: Lesson 1

PLACE VALUES AND VALUES OF WHOLES

Reviewing place values up to millions.

Give the value of each digit in 4123456.

NUMBER	DIGIT	PLACE VALUE	VALUE
6,142,572	6	MILLIONS	6 X 1,000,000 = 6,000,000
	1	HUNDRED THOUSANDS	1 X 100,000 = 100,000
	4	TEN THOUSANDS	4 X 10,000 = 40,000
	2	THOUSANDS	2 X 1000 = 2000
	5	HUNDREDS	5 X 100 = 500
	7	TENS	7 X 10 = 70
	2	ONES	2 X 1 = 2

REF: MK Bk 5 page 26 – 27

Understanding MTC bk 5 pg 16 – 17

Mk bk 6 pg 34

WK. 2: Lesson 2

Writing figure in words

When writing in words, we group the number into it's major groups:

Example

4,156,036

Millions	Thousands	Units
4	156	036

4 156 036 ⟶ **Four millions one hundred fity six thousands thirty six.**

REF: Understanding MTC bk 5 pg 13, bk 6 pg 23

Prim MTC, Macmillan bk 5 pg 18 – 19

WK. 2: Lesson 3

Writing words in figures

Write six hundred two thousand, four hundred sixty four in figures.

Solution: **b**reakdown the number in it's groups.

Six hundred two thousand = 602,000

Four hundred sixty four = + 464

602,464

Example II

Write two million, seven hundred thirty two.

Two million ⟶ 2,000,000

Seven hundred sixty five thousand ⟶ 765,000

Four hundred thirty two ⟶ 432

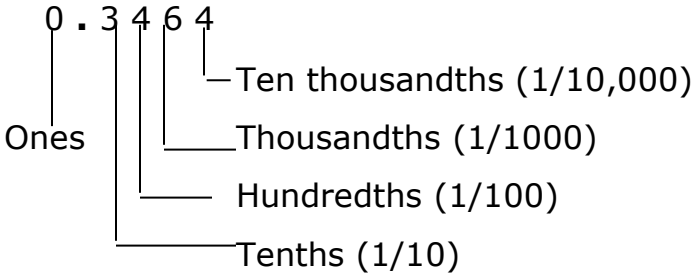

2,765,432

REF: Mk bk 6 pg 38 -39.

WK. 2: Lesson 4

PLACE VALUES AND VALUES OF DECIMALS

Write the place value and value of each digit in the No. below.

Values (Note: Value = digit x place value)

0 . 3 4 6 4

- 4 x $\frac{1}{10,000}$ = $\frac{4}{10,000}$ = 0.0004
- 6 x $\frac{1}{1000}$ = $\frac{6}{1000}$ = 0.006
- 4 x $\frac{1}{100}$ = $\frac{4}{100}$ = 0.04
- 3 x $\frac{1}{10}$ = $\frac{3}{10}$ = 0.3

What is the value of 8 in 0.238

0 . 2 3 8

8 x $\frac{1}{1000}$ = $\frac{8}{1000}$ = **0.008**

Writing decimals in words.

i) 0.5 = $\frac{5}{10}$

= **Five tenths**

ii) 1.8 **One and eight tenths.**

iii) 21.008

Twenty one and eight thousandths.

iv) 195.075

One hundred ninety five and seventy five thousandth.

Reference: 1) Learning Math standard five pg 29.

2) Mk bk 6 pg 46

WK. 2: Lesson 5 & 6

Writing decimals in figures

Example

1) Thirty six and four tenths

36 and $\frac{4}{10}$

36 and 0.4

36.0

0.4

36.4

2) Six tenth

$\frac{6}{10}$ = **0.6**

3) Fourteen hundredths

$\frac{14}{100}$ = **0.14**

4) One hundred twenty and fourteen hundredths.

120 and $\frac{14}{100}$

120 and 0.14

Or

120.00

0.14

120.14

Reference: 1) Mk bk 6, pg 45.

WK. 3: Lesson 1

EXPANDING WHOLE NUMBERS

Expanding using values

1) Expand 349

349 = (3 x 100) + (4 x 10) + (9 x 1)

300 + 40 + 9

2) Expand 48914

48914 = (4 x 10,000) + (8 x 1000) + (9 x 100) + (1 x 10) + (4 x 1)

40,000 + 8000 + 900 + 10 + 4

Expanding using powers / exponents

148 =

1	4	8
10^2	10^1	10^0

$(1 \times 10^2) + (4 \times 10^1) + (8 \times 10^0)$

7 9 6 2 =

7	9	6	2
10^3	10^2	10^1	10^0

$(7 \times 10^3) + (9 \times 10^2) + (6 \times 10^1) + (2 \times 10^0)$

Writing expanded numbers as single numbers / short form.

What number has been expanded to give;

$(2 \times 10^3) + (4 \times 10^2) + (3 \times 10^1) + (7 \times 10^0)$

REFERENCE: Mk bk 5, pg 31 – 32, MK Bk. 7 pg 48

Understanding Math bk 5, pg 21.

WK. 3: Lesson 2

EXPANDING DECIMALS

1) Using values

i) Expand 2 8 . 3 6 9

=

2	8	. 3	6	9
T	O	TTHS	HTHS	THS

= (2 X 10) + (8 X 1) + (3 X $\frac{1}{10}$) + (6 X $\frac{1}{100}$) + ($\frac{9}{1000}$)

20 + 8 + 0.3 + 0.06 + 0.009

ii) Expand 1 3 5 . 6 5

$$(1 \text{ X } 100) + (3 \text{ X } 10) + (5 \text{ x } 1) + (6 \text{ X } \frac{1}{10}) + (7 \text{ X } \frac{1}{100})$$

100 + 30 + 5 + 0.6 + 0.07

2. **Using powers**

Expand 28.369 using powers.

2	8	.	3	6	9
10^1	10^0		10^{-1}	10^{-2}	10^{-3}

$(2 X10^1) + (8 X10^0) + (3 X10^{-1}) + (6 X10^{-2}) + (9 x 10^{-3})$

Writing expanded decimals in their shortest form. Mk bk. 7, pg 48 – 49

WK. 3: Lesson 3

ROMAN NUMERALS

HINDU	1	5	10	50	100	500	1000
ROMAN	I	V	X	L	C	D	M

A) **Repeated Roman numerals**

Numbers with 2 and 3.

2 = I+ I = II 20 = 10 + 10 = XX

3 = I + I + I = III 30 = 10 + 10 + 10 = XXX

200 = 100 + 100 = CC

300 = 100 + 100 + 100 = CCC

B) **Subtraction Roman Numerals**

(number with 4 and 9)

4 = (5 – 1) = IV 40 = (50 – 10) = XL

9 = (10 – 1) = IX 90 = (100 – 10) = XC

400 = (500 – 100) = CD 900 = (1000 – 100) = CM

C) **Addition Roman numerals**

Numbers with (6, 7 and 8)

6 = (5+1) = VI	60 = 50 + 10 = LX	600 = 500 + 100 = DC
7 = (5+2) = VII	70 = (50+20) = LXX	700 = 500 + 200 = DCC
8 = (5+3) = VIII	80 = (50 + 30) = LXXX	800 = 500 + 300 = DCCC

Examples

Write the following as Roman numerals.

i) 75 = 70 + 5
=LXX + V
= **LXXV**

445 = 400 + 40 + 5
= CD + XL + V
= **CDXLV**

Changing roman numerals to Hindu – Arabic

Express LXXVI in hindu – Arabic numerals

= LXX + VI
= 70 + 6
= **76**

Mzee Yokana was born in the year MCMXLII. Express this year in Hindu – Arabic.

MCMXLII = M + CM + XL + II
1000 + 900 + 40 + 2
1942

REFERENCE: Mk bk 6 pg 50, Mk bk 5 pg 5 – 6
Learning MTC standard 5, pg 11

WK. 3: Lesson 4

ROUNDING OFF WHOLE NUMBERS

Rounding off means taking a given place value to another level.

When rounding off, we consider that if the digit on the right of the required place value is less than 5 we add to it 0 and replace all digits on it's right with 0's.

If the figure on the right of the place value is 5 or more add one to it.

Example

Round off 214 to the nearest tens.

H	T	O		
2	1	4		
	0			
2	**1**	**4**	=	**210**

Example II

Round off 7591 to the nearest thousands.

Th	H	T	O
7	5	9	1
1	↓	↓	↓
8	0	0	0

$\therefore$ **7591 ≈ 8000**

REFERENCE: **Mk bk 6 pg 47**
Mk bk 5 pg 20
Macmillan bk 5 pg 22 – 24.

WK. 3: Lesson 5

ROUNDING OFF DECIMALS

Example

1) Round of 31.46 to the nearest tenths.

31.46
1
31.5

NB: When rounding off decimals the digits on the right of the place value rounded off are not replaced.

2) Round off 4.169 to the nearest whole number.

Note: nearest whole number also means the place of ones.

4.169
0
4.000

$\therefore$ **4.169 ≈ 4**

NB:

0, 1, 2, 3, 4, 5, 6, 7, 8, 9

Round down **Round up**

REFERENCE: Understanding MTC bk 6 pg 25-26
Mk bk 6 pg 48.

OPERATION ON NUMBERS

WK. 3: Lesson 6

Review of work done in P.4 on addition and subtraction.

WK. 4: Lesson 1

MULTIPLICATION

Terms used: product

Example

1) Find the product of 28 and 23.

28
X 23

28 x 20 = 560
28 X 3 = + 84
644

23 = 20 + 3

2) In Moses' house there are 13 rooms and each room has 24 chairs. How many chairs are there altogether?

13
X 24

13 x 4 = 52
13 X 20 = + 260
312 chairs

24 = 20 + 4

REFERENCE: Understanding MTC bk 5 pg 42 – 45, MK BK. 5 pg 54 – 56
Macmillan MTC bk 5 pg 31 – 32

WK. 4: Lesson 2

DIVISION

Terms used: **share.**

Quotient.

Share 288 book s equally among 12 classes.

$$12\overline{)288}$$

024

0 x 2 = 0

28

2 x 12 = 24

4 8

4 x 12 = 48

1	12
2	24
3	36
4	48
5	60
6	72
7	84
8	96
9	108

Each class gets 24 books

REFERENCE: Understanding MTC bk 5 pg 62 – 66

Macmilan Pr MTC pg 32 – 36.

Mk bk. 5 pg. 57 – 62

WK. 4: Lesson 3

MIXED OPERATION (BODMAS)

Brackets

Of

Division

Multiplication

Addition

Subtraction

1) Workout: 240 ÷ (5 x 8)

240 ÷ 40

$\frac{240}{40}$ = **6**

2) Simplify: 8 – 12 + 4

8 + 4 – 12

12 – 12

0

REFERENCE: Understanding MTC bk 6 62 – 66 MK. BK. 5 PG. 63

Macmillan bk 5 pg 37 – 38

WK. 4: Lesson 4

BASES

Introduction
- Names of bases
- The digit used in each base.
- Place values

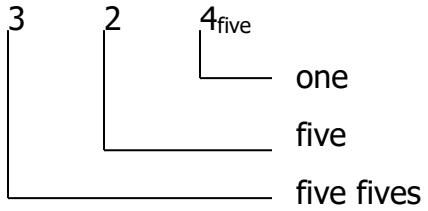

Bases: are systems of counting or grouping numbers.

Below are some of the systems their names and digits used in each.

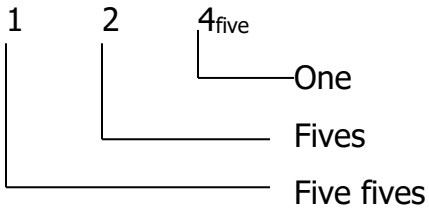

Base	Name of base	Digits used
Base Two	Binary	0, 1
Base Three	Ternary	0, 1, 2
Base Four	Quaternary	0, 1, 2, 3
Base Five	Quinary	0, 1, 2, 3, 4
Base Six	Senary	0, 1, 2, 3, 4, 5
Base Seven	Septenary	0, 1, 2, 3, 4, 5, 6
Base Eight	Octal	0, 1, 2, 3, 4, 5, 6, 7
Base nine	Nonary	0, 1, 2, 3, 4, 5, 6, 7, 8
Base Ten	Deciaml (denary)	0, 1, 2, 3, 4, 5, 6, 7, 8, 9

Place values in base five

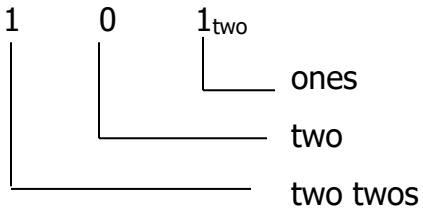

Give the place value of each of the digits in 324_{five}

Example II 124_{five}

In base two the place values are:

Writing bases in words

A part form base ten (decimal base), when writing other bases in words we name their individual digits.

Example

i) 43_{five} in words is written as

Four, three, base five.

ii) 213_{five} = Two, one, three, base five.

REFERENCE: MK Bk 5, pg 70 – 71

WK. 4: Lesson 5

EXPANDING BASES

Example

Expand 13_{five}

1 3

ones

fives

= (1 group of fives) (3ones)

= (1 x fives) + (3xones)

= **(1 x 5) + (3 x 1)**

OR

Using powers

1	3
5^1	5^0

= $(1 \times 5^1) + (3 \times 5^0)$

Expand 213_{five}

Place values 2 1 3

Ones

Fives

Five fives

= $(2 \times 5 \times 5) + (1 \times 5) + (3 \times 1)$

Example III

Expand 1 0 1_{two}

1 0 1
- 1 → ones
- 0 → two
- 1 → two twos

(1 x 2 x 2) + (0 x 2) + (1 x 1)

(REF: MK. BK. 7, PG. 38)

WK. 4: Lesson 6

CHANGING FROM BASE FIVE TO BASE TEN

Example I

Change 14_{five} to base ten

14_{five}
- 1 → fives
- 4 → ones

= (1 x 5) + (4 x 1)

5 + 4

= **9_{ten}**

Example II

Change 213_{five} to base ten

place values 2 1 3
- 3 → ones
- 1 → fives
- 2 → five fives

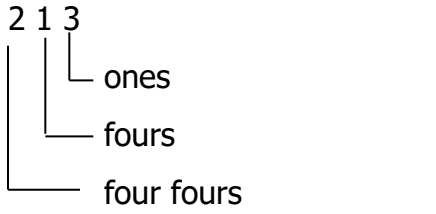

= (2 x 5 x 5) + (1 x 5) + (3 x 1)

50 + 5 + 3

= **58_{ten}**

Example III

Change $2\ 1\ 3_{four}$ to base five.

$(2 \times 4 \times 4) + (1 \times 4) + (3 \times 1)$

$(8 \times 4) + 4 + 3$

$= \mathbf{39_{ten}}$

REFERENCE: MK bk 5 pg 71 // MK Bk 7, pg 39

WK. 5: Lesson 1

CHANGING FROM BASE TEN TO OTHER BASES

Change 9_{ten} to base five

	No.	Rem
5	9	4
	1	

$= \mathbf{14_{five}}$

Change 58_{ten} to base five.

	No.	Rem
5	58	3
5	11	1
	2	

$\therefore 58_{ten}$

$= 2\ 1\ 3_{five}$

Express 33_{ten} to base three

	No.	Rem
3	33	0
3	11	2
3	3	0
	1	

$\mathbf{33_{ten} = 1020_{three}}$

REFERENCE: **MK BK 5 72 // Mk. Bk. Pg. 39**

MACMILLAN BK 5 PG 6

WK. 5: Lesson 2

FINDING UNKNOWN BASES

Examples

Given $23_x = 19_{ten}$

Find the value of x

2	3
x^1	x^0

$= (2 \times x^1) + (3 \times x^0) = 19$

$(2 \times x) + (3 \times x) = 19$

$2x + 3$

$2x + 3 - 3 = 19 - 3$

$2x = 16$

$\frac{2x}{2} = \frac{16}{2}$

$x = 8$

ii) $55_y = (5 \times y^1) + (5 \times y^0) = 35$

$5 \times y + 5 \times 1 = 35$

$5y + 5 = 35$

$5y + 5 - 5 = 35 - 5$

$\frac{5y}{5} = \frac{30}{5}$

$y = 6$

REFERENCE: **Fountain primary math bk 7 pg 37**

Mk Bk 7 old edition pg 43

WK. 5: Lesson 3

ADDITION OF BASES

Workout: $24_{five} + 33_{five}$

24_{five} $\quad\quad$ $4 + 3 = 7 \div 5 = 1^{r2}$

33_{five} $\quad\quad$ $1 + 2 + 3 = 6 \div 5 = 1^{r2}$

112_{five}

In addition if the answer is bigger than the base we divide, write the remainder and regroup the answer.

Example I

$10011_{two} + 1100_{two}$

10011_{two}

1100_{two}

11111_{two}

ACTIVITY: Understanding MTC bk 6 pg 46 – 47 // MTC bk 7 pg 40

WK. 5: Lesson 4

SUBTRACTION OF BASES

Example: $101_{two} - 11_{two}$

101_{two}

$- 11_{two}$

010 $\quad\quad$ ⟹ **10_{two}**

Subtract: 40_{five}

$- 22_{five}$

13_{five}

Fountain Bk. 7 pg 34

WK. 5: Lesson 6

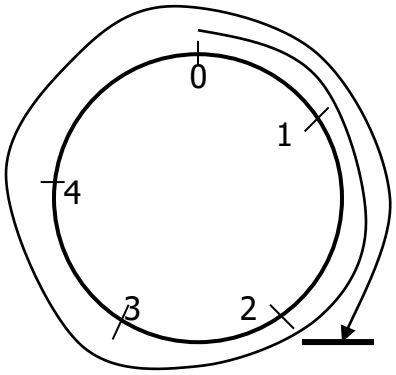

FINITE SYSTEMS

This is a system of grouping where we consider only the remainders.

It can also be called modular (mod) or clock Arithmetic.

Grouping in finite systems

Finite 5.

7 = 2 (finite 5)

By calculation

7 = 7 ÷ 5

= 1^{r2}

7 = 2 (finite 5)

Express 10 in finites

10 = 10 ÷ 5

= 2^{r0}

10 = 0 (finite 5)

Write 6 in finite 7

Since 6 is less than 7

It remains as 6

6 = 6 (finite 7)

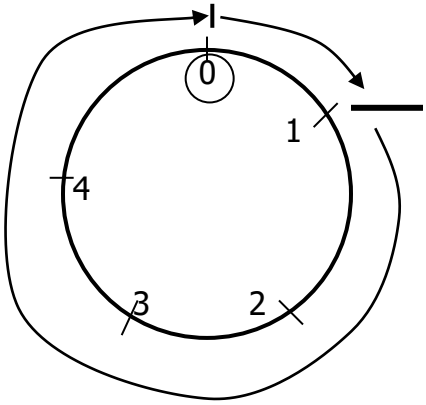

REFERENCE: MK bk 5 pg 206

WK. 6: Lesson 1

ADDITION IN FINITE SYSTEMS

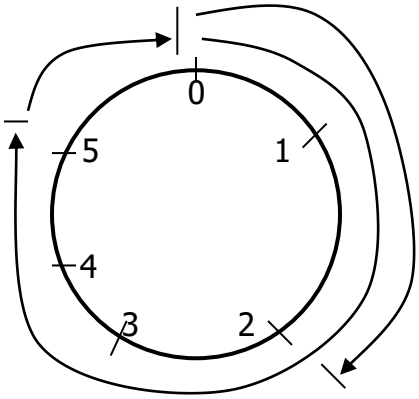

Using a dial

Add: 1 + 4 (finite 5)

1 + 4 = 0 (finite 5)

ii) 4 + 2 + 3 (finite 7)

4 + 2 + 3 + 2 (finite 7)

1 + 4 + (finite 5)

Reference: MK Bk. 5 pg 210

WK. 6: Lesson 2

SUBTRACTION IN FINITE

1. $3 - 4 =$ ____ (finite 5)

   $(5 + 3) - 4$

   $8 - 4 = 4$

2. $6 - 5 =$ __ (mod 7)

   $6 - 5 = 1 \pmod 7$

Ref: MK Bk 7, pg 330

WK. 6: Lesson 3

NUMBER PATTERNS AND SEQUENCES

Review of P.4 Work on G.C.F and L.C.M from listed factors and multiples Mk Bk. 5 pg 80 – 82

WK. 6: Lesson 4

TYPES OF NUMBERS.

1) Whole numbers ⇒ 0, 1, 2, 3, 4, 5, …….

2) Counting numbers/ Natural numbers ⇒ 1, 2, 3, 4, 5, …….

3) Odd numbers: These are numbers that give a remainder when divided by 2

   ⇒ {1, 3, 5, 7, ……}

4) Even numbers: These are ones that are exactly disable by two

   ⇒ {0, 2, 4, 6, 8, 10, ……}

5) Prime numbers: These are numbers with only two factors.

   ⇒ {2, 3, 5, 7, 11, 13, ……}

6) Composition numbers: These are numbers with more than 2 factors

   ⇒ {4, 6, 8, 9, 10, 12, ……}

7) Square numbers: These are numbers got by multiplying a number by its self.

   ⇒ {1, 4, 9, 16, 25, ……}

8) Cubic numbers: These are got by multiplying the same number three times.

   {1, 8, 27, 64, ……}

9) Triangular numbers: These are got by adding consecutive counting numbers.

   {1, 3, 6, 10, 15, 21, ……}

   $^{+}2\ ^{+}3\ ^{+}4\ ^{+}5\ ^{+}6$

REFERENCE: **Understanding MTC bk 6 pg 81 – 84**

Mk Bk 5 Pg 80 – 89

WK. 6: Lesson 5

DIVISIBILITY TESTS

These show which number is exactly divisible by another given number.

Divisibility test for 2.

A number is divisible by 2 if the last digit is an even number

i,e 0, 2, 4, 6, 8, ……..

Divisibility test for 3.

A number is divisible by 3 if the sum of its digits is divisible by 3.

Example

State whether 144 is divisible by 3.

Sum of the digits $1 + 4 + 4$

$= 9$

9 is divisible by 3

$\therefore$ 144 is divisible by 3.

Divisibility test for 4

A number is divisible by 4 if its last two digits are zero or divisible by 4.

Divisibility test for 5

A number is divisible by 5 if its last digit is either 0 or 5.

Divisibility test for 6

A number is divisible by 6 if it is even and the sum of its digits is divisible by 3.

Example:

Is 612 divisible by 6 ?

612 is divisible by 6 since it is an even number and the sum of its digits (6+1+2=9) as shown is divisible by 3.

Divisibility test for 7

When the last digit of a number is doubled and the result is subtracted from the number formed by the remaining digits, the result must be divisible by 7.

Example:

Is 861 divisible by 7?

The last digit is 1 and the number formed by the remaining digits is 86.

When is doubled it gives (1+1) =2. Subtract 2 from 86 (86-2) =84.

84 is divisible by 7 $\therefore$ 861 is also divisible by 7.

Note: For big numbers that cannot easily be detected as numbers divisible by 7, repeat the same procedure on the last result obtained after subtracting.

Divisibility test for 9

A number is divisible by 9 if the sum of its digits is divisible by 9.

Example:

198: The sum of 198 is 1 + 9 + 8 = 18

18 is divisible by 9 therefore 198 is divisible by 9.

Divisibility test for 10

A number is divisible by 10 if its last digit is 0.

REFERENCE: MK BK 6 pg 65 – 67.

WK. 6: Lesson 6

PRIME FACTORIZATION OF NUMBERS

Prime factorizing means dividing a number by its prime factors.

We use prime factors when prime factorizing e.g = {2, 3, 5, 7, 11, 13, ……}

Example I

Prime factorise 18.

We can either use a ladder or a factor tree. i.e

2	18
3	9
3	3
	1

We can represent the prime factors as follows.

Set notation / subscript form

18 = $\{2_1, 3_1, 3_2\}$

Multiplication form

18 = 2 x 3 x 3

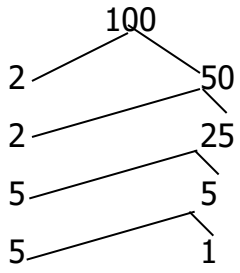

power form (expanded form)

18 = $2^1 \times 3^2$

Example II

Prime factorise 100.

* Take note of factors of 100 that are prime numbers.

Subscript form ÷

100 = $\{2_1, 2_2, 5_1, 5_2\}$

Multiplication form

100 = 2 x 2 x 5 x 5

Power form

100 = $2^2 \times 5^2$

WK. 7: Lesson 1

FINDING L.C.M BY PRIME FACTORIZING

Example

Find the L.C.M of 4 and 12 by prime factorization.

2	4	12
2	2	6
3	1	3
	1	1

L.C.M = 2 x 2 x 3

= 4 x 3

= **12**

Example II

Find the L.C.M of 12 and 20.

2	12	20
2	6	10
3	3	5
5	1	5
	1	1

L.C.M = 2 x 2 x 3 x 5

= 4 x 15

= 60

REFERENCE: MK MTC Bk 5 pg 86.

WK. 7: Lesson 2

Finding G.C.F by prime factorizing

Example:

Find the G.C.F of 6 and 8

2	6	8
	3	4

G.C.F = 2

Example II

Find the G.C.F of 24 and 36.

2	24	36
2	12	18
3	6	9
	2	3

G.C.F = 2 x 2 x 3

= 4 x 3 = **12**

WK. 7: Lesson 3

Representing rime factors on Venn diagrams

Example I

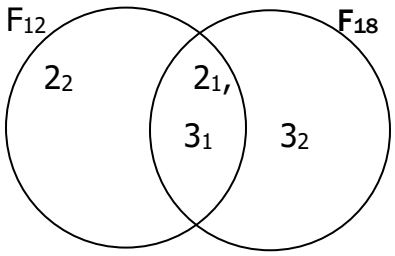

Represent the prime factors of 12 and 18 on a Venn diagram.

2	12
2	6
3	3
	1

2	18
3	9
3	3
	1

F_{12} = { 2_1, 2_2, 3_1 }

F_{18} = { 2_1, 3_1, 3_2 }

a) Find the G>C>F of 12 and 18.

G.C.F product of the intersection

$F_{12} \cap F_{18}$ = {2_1, 3_1 }

$\therefore$ **G.C.F = 2 x 3**

<u>6</u>

L.C.M = product of the union.

$F_{12} \cup F_{18}$ = {2_1, 2_2, 3_1 , 3_2}

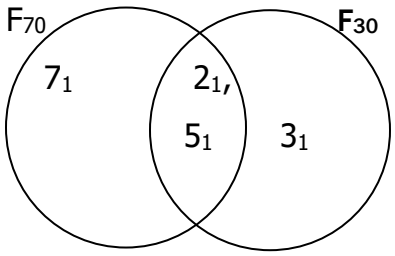

= 2 x 2 x 3 x 3

= 4 x 9

= **<u>36</u>**

<u>Example 2</u>

Below is a venn diagram showing factors.

a) Find the G.C.f of 70 and 30.

G.C.F = product of the intersection

$F_{70} \cap F_{30}$ = {2_1, 5_1 }

G.C.F = 2 x 5

= **<u>10</u>**

b) Find the L.C.M of 20 and 70.

L.C.M = product of the union

$F_{70} \cup F_{30} = \{2_1, 3_1, 5_1, 7_1\}$

L.C.m = $2_1 \times 3_1 \times 5_1 \times 7_1$

$= 6 \times 35$

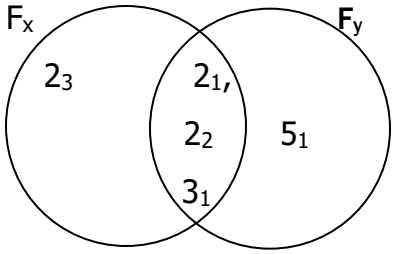

L.C.M = **<u>210.</u>**

Activity: Understanding MTC Bk 6 Pg 79 – 81

MK BK. 6 pg. 86

WK. 7: Lesson 4

Finding the unknown number given prime factors on a venn diagram

a) Find the value of x.

$F_x = \{2_1, \times 2_2, \times 3_1\}$

$x = 4 \times 6$

$x =$ **<u>24</u>**

b) Find the value of y.

$F_y = \{2_1, 2_2, 3_1, 5_1\}$

$y = 2_1 \times 2_2 \times 3_1 \times 5_1$

$y = 2 \times 2 \times 3 \times 5$

$y = 4 \times 15$

$y =$ **<u>60</u>**

REFERENCE: MK BK 6 Pg 88 – 89

WK. 7: Lesson 5

SQUARE ROOTS OF NUMBERS

Review of square numbers.

i.e. {1, 4, 9, 16, 25, 36, 49, 64, 81, ……}

A square number is got by multiplying a number by it's self.

A square root is a number that is multiplied by its self to give a square number.

The symbol for square root is $\sqrt{}$

Example

Find the square root of 36.

2	36
2	18
3	9
3	3
	1

$\sqrt{36} = \sqrt{(2x\not{2})x(2x\not{3})}$

$\sqrt{36}$ = 2 x 3

= **6**

Example:

Find the square root of 100.

2	100
2	50
5	25
5	5
	1

$\sqrt{100} = \sqrt{(\not{2}x2)x(5x\not{5})}$

= 2 x 5

= **10**

WK. 7: Lesson 6

Review of P.4 work on fraction)

FRACTIONS

1) Express the missing following as mixed fractions.

a) $\frac{3}{2}$ b) $\frac{11}{3}$ c) $\frac{47}{10}$ d) $\frac{49}{6}$

2) Express each of these fractions as improper fractions

a) $1\frac{1}{2}$ b) $1\frac{1}{4}$ c) $3\frac{5}{12}$ d) $33\frac{1}{3}$

3) Write five equivalent fractions to each of these fractions

a) $\frac{1}{3}$ b) $\frac{2}{3}$ c) $\frac{1}{8}$ d) $\frac{4}{9}$

4) Reduce these fractions to their lowest terms

a) $\frac{2}{4}$ b) $\frac{12}{18}$ c) $\frac{8}{12}$ d) $\frac{27}{45}$ e) $\frac{125}{200}$

5) Compare the fractions below using the symbols <, > or = (show the working)

a) $\frac{5}{6} ____ \frac{5}{8}$ b) $\frac{1}{3} ____ \frac{1}{4}$ c) $\frac{1}{2} ____ \frac{1}{3}$ d) $\frac{1}{2} ____ \frac{4}{8}$

e) $\frac{7}{9} ____ \frac{7}{8}$ f) $\frac{14}{30} ____ \frac{7}{15}$

REFERENCE: Learning MTC pg 12 – 23

MK Bk 5 pg 118.

WK. 8: Lesson 1

Ordering fractions

This involves arranging in either ascending or descending order.

Ascending order

Means from lowest to highest.

Descending Order

Means from highest to lowest.

Example

Arrange $\frac{1}{3}, \frac{1}{2}, \frac{1}{4}$ in ascending order.

L.C.M method;

M_3 = { 3, 6, 9, (12), 15, ……..}

M_2 = { 2, 4, 6, 8, 10, (12), 14, ……..}

M_4 = { 4, 8, (12), 16, ……..}

L.C.M = 12

$\frac{1}{\cancel{3}} \times \cancel{12} \Rightarrow 1 \times 4 = 4$

$\frac{1}{\cancel{2}} \times \cancel{12} \Rightarrow 1 \times 6 = 6$

$\frac{1}{\cancel{4}} \times \cancel{12} \Rightarrow 1 \times 3 = 3$

In ascending order

$= \frac{1}{4}, \frac{1}{3}, \frac{1}{2}$

Method II

Arrange $\frac{5}{8}, \frac{3}{4}, \frac{4}{6}$ in descending order.

Renaming (equivalent fractions)

$\frac{5}{8} = \frac{10}{16} = \boxed{\frac{15}{24}} = \frac{20}{32} = \frac{25}{40} = \frac{30}{48}$

$\frac{3}{4} = \frac{6}{8} = \frac{9}{12} = \frac{12}{16} = \frac{15}{20} = \boxed{\frac{20}{24}}$

$\frac{4}{6} = \frac{8}{12} = \frac{12}{18} = \boxed{\frac{16}{24}} = \frac{20}{30} = \frac{24}{36}$

In descending order = $\frac{3}{4}, \frac{4}{6}, \frac{5}{8}$

REFERENCE: MK Bk 5, pg 119

Comparing fractions using <, > or =

Example

Use **>, < or =**

$\frac{1}{3}$ **>** $\frac{1}{4}$ M_3 = 3, 6, 9, 12

$\frac{1}{\cancel{3}}$ x ~~12~~ M_4 = 4, 8, 12, 16

= **4** $\frac{1}{\cancel{4}}$ x ~~12~~ = **3**

ii) Which is smaller $\frac{5}{6}$ or $\frac{1}{2}$

L.C.M of 2 and 6.

= 6

$\frac{5}{\cancel{6}}$ x ~~6~~ = 5 $\frac{1}{\cancel{2}}$ x ~~6~~ = 3

$\frac{1}{2}$ **<** $\frac{5}{6}$

REFERENCE: MK Bk 5 pg 120.

WK. 8: Lesson 2

ADDITION OF FRACTIONS

Example I

$\frac{1}{4} + \frac{1}{2}$ $\qquad$ $\frac{1}{4} + \frac{1}{2} = \frac{1+2}{4}$

$\frac{1}{4} = \frac{2}{8} = \frac{3}{12}$ $\qquad$ $\frac{3}{4}$

$\frac{1}{2} = \frac{2}{4} = \frac{3}{6}$

Example 2

John filled $\frac{1}{2}$ of a tank in the morning and $\frac{2}{5}$ in the afternoon, what fraction did he fill altogether?

$\frac{1}{2} + \frac{2}{5}$ $\qquad$ $M_2 = \{ 2, 4, 6, 8, 10, 12, \ldots\ldots\ldots\ldots\}$

$M_2 = \{ 5, 10, 15, 20, \ldots\ldots\ldots\ldots\ldots\}$

$\frac{1}{2} + \frac{2}{5} = \frac{5+4}{10}$

$= \frac{9}{10}$

REFERENCE: MK BK 5 Pg 121 -125.

WK. 8: Lesson 3

SUBTRACTION OF FRACTIONS

Example I

Subtract; $\frac{4}{5} - \frac{1}{5} \longrightarrow \frac{4-1}{5} = \frac{3}{5}$

Example II

A baby was given $\frac{5}{6}$ of a glass of water. If it drunk $\frac{7}{12}$, What fraction remained?

$\frac{5}{6} - \frac{7}{12}$ $\qquad$ $M_2 = \{ 6, \textcircled{12}, 18, 24\}$

$M_{12} = \{ \textcircled{12}, 24, 36\}$

L.C.M = 12.

$\frac{10-7}{12} = \frac{3}{12} \longrightarrow \frac{1}{4}$

Activity: **Mk bk 5 Pg 126 – 127.**

2) Isaac had $\frac{3}{4}$ of sugarcane. If he gave $\frac{3}{5}$ of it to Peter. What fraction did he remain with.

$$\frac{3}{4} - \frac{3}{5} = \frac{15-12}{20}$$

$$= \frac{3}{20}$$

REFERENCE: **Understanding MTC Std 5 pg 19 – 22.**
MK BK 5 Pg 126 – 127.

WK. 8: Lesson 4

Multiplication of fractions

1) i) $\frac{1}{3} \times \frac{2}{5} = \frac{1X2}{3X5} = \frac{2}{15}$

ii) $\frac{1}{2} \times \frac{1}{2} = \frac{nxn}{dxd}$

$$\frac{1x1}{2x2} = \frac{1}{4}$$

2) What is $\frac{2}{5}$ of 20 books?

$\frac{2}{\cancel{5}} \times \cancel{20}$

2 x 4 = **8 books**

3) What is $2\frac{1}{2}$ of 2 dozens.

1 doz = 12 books

2 dozens = 12 x 2

= 24 books

$2\frac{1}{2} \times 24$

$\frac{5}{\cancel{2}} \times \cancel{24}$ = **60 books**

REFERENCE: **Mk Books 5 page 129 – 137**

Learning MTC Std 5 pg 26 – 28

WK. 8: Lesson 5

RECIPROCALS OF FRACTIONS

Reciprocal of $\frac{3}{5}$ is $\frac{5}{3}$

A reciprocal is a number multiplied by a given fraction to give 1.

The Reciprocal of $\frac{2}{3}$ is $\frac{3}{2}$

Check: $\frac{2}{3} \times \frac{3}{2} = \frac{\cancel{6}}{\cancel{6}}$

= 1

Any fraction multiplied by its reciprocal always gives 1.

Example:

Find the reciprocal of $\frac{3}{4}$

Let the reciprocal be m

$\frac{3}{4} \times m = 1$

$\cancel{4} \times \frac{3}{\cancel{4}} m = 1 \times 4$

$3m = 4$

$\frac{\cancel{3}m}{\cancel{3}} = \frac{4}{3}$

$m = \frac{4}{3}$

Consider the reciprocal of

a) 7

b) 0.7

c) $1\frac{1}{3}$

d) 2.5

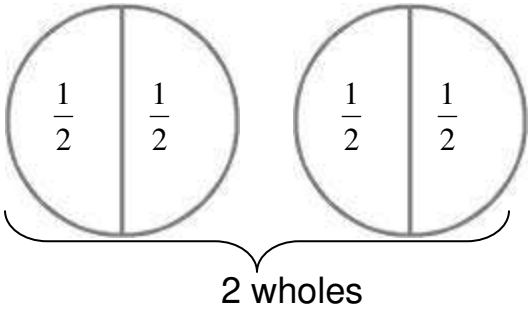

REFERENCE: **Mk Bk 5 pg 133.**

WK. 8: Lesson 6

Division of fractions

Wholes by fractions

1) $2 \div \frac{1}{2}$ (Use of diagrams)

$\therefore 2 \div \frac{1}{2} =$ **4**

Example 2

$3 \div \frac{1}{4} = \frac{3}{1} \times \frac{4}{1}$

$= \frac{12}{1} \Longrightarrow 12$

Example 3

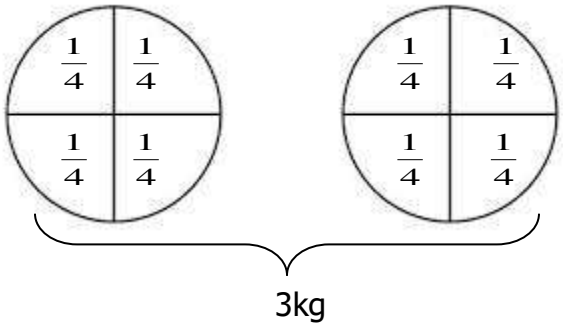

How many half litre cups are in a 3 litre jerry can?

$3 \div \frac{1}{2}$

$3 \times \frac{2}{1} = 6$ cups

Example 4

How many $\frac{1}{4}$ kg packets of sugar can be packed from 3kg?

12 packets can be packed.

Division of fractions by fractions

Example I

$\frac{2}{3} \div \frac{4}{5} \Longrightarrow \frac{2}{3} \times \frac{5}{4}$

$= \frac{\cancel{10}}{\cancel{12}} = \frac{5}{6}$

Example 2

$\frac{3}{4} \div \frac{1}{3}$

$\frac{3}{4} \times \frac{3}{1} = \frac{9}{4}$

$\mathbf{2}\frac{1}{4}$

REFERENCE: MK Bk 5 pg 134 – 136

ii) How many boys are there?

$\frac{1}{\cancel{3}} \times \cancel{60}$

1 x 20

= **20 boys**

c) How many girls are there?

$\frac{2}{3} \times \cancel{60}$

2 x 20

40 girls

d) How many more girls are there than the boys?

4 0

- 2 0

2 0 more girls

REFERENCE: Mk Bk 5 pg 132.

WK. 9: Lesson 1

Ordering decimals

Arrange 0.4, 0.44, 4.4 in ascending order.

As common fractions $\Longrightarrow \frac{4}{10}, \frac{44}{100}, \frac{44}{10}$

LCD = 100 (biggest denominator)

Multiply each by the biggest denominator.

$\frac{4}{1\cancel{0}} \times 10\cancel{0}$

$= 40$

$\frac{44}{\cancel{100}} \times 1\cancel{00}$

$= 44$

$\frac{44}{1\cancel{0}} \times 10\cancel{0}$

$= 440$

In ascending order,

0.4, 0.44, 4.4

REFERENCE: ***Learning MTC Std 5 pg 31 – 32***

Mk bk 5 pg 145 – 146.

WK. 9: Lesson 2

MULTIPLICATION OF DECIMALS

Multiply: 0 . 2 x 0 . 3

Method 1

Re-write decimals ad fractions.

0.2 x 0.3

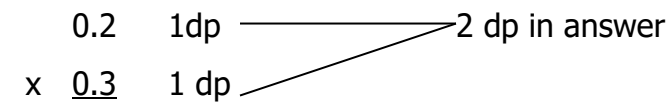

$= \frac{2}{10} \times \frac{3}{10}$ Remember $\frac{nxn}{dxd}$

$= \frac{2x3}{10x10}$

$= \frac{6}{10}$ **=0.06**

Method 2

0.2 x 0.3

0.6

+ 0 0

0.06

∵ 0.2 x 0.3

= **0.06**

REFERENCE: **Learning MTC Std pg 33 – 34.**

WK. 9: Lesson 3

DIVISION OF DECIMALS

Example 1: 0.2 ÷ 0.4

$= \frac{2}{10} \div \frac{4}{10}$

$= \frac{2}{\cancel{10}} \times \frac{\cancel{10}}{4}$

$= \frac{2x1}{1x4} = \frac{\cancel{2}}{\cancel{4}} = \frac{1}{2}$

Example 2: 0.3 ÷ 0.03

$= \frac{3}{10} \div \frac{3}{100}$

$= \frac{3}{\cancel{10}} \times \frac{\cancel{100}}{3}$

= 1 x 10

=**10**

REFERENCE: **MTC Bk 6 pg 118 – 119.**

WK. 9: Lesson 4

RATIO

A ratio is a comparison of two numbers.

e.g 2 : 3 which is read as two to three.

Expressing ratios as fractions

i) Express 2 : 3 as a fraction.

2 : 3 = $\frac{2}{3}$

ii) The ratio of boys to girls in a class is 3 : 4, express this as a fraction.

3:4 = $\frac{3}{4}$

Expressing fractions as ratios

i) Express $\frac{1}{3}$ as a ratio.

$\frac{1}{3}$ = 1:3

ii) $\frac{5}{6}$ of a class are present, express this in ratio from $\frac{5}{6}$.

= 5 : 6

REFERENCE: Mk Bk 6 Pg 125 - 126

WK. 9: Lesson 5

Expressing quantities as ratios

Example

Henry has 12 books and John has 20 books. What is the ratio of Henry's books to John's books?

Henry	to	John
12	:	20
$\frac{\cancel{12}}{\cancel{4}}$	:	$\frac{\cancel{20}}{\cancel{4}}$ → Reduce

3 : 5

Express 20 minutes as a ratio of 1 Hr.

1Hr = 60minutes

20Min : 60Min

$\frac{\cancel{20}}{\cancel{20}}$: $\frac{\cancel{60}}{\cancel{20}}$ ⟶ Reduce

1 : 3

NB:

When comparing two or more quantities, rations must be expressed in the same units and in the lowest terms.

REFERENCE: Mk Bk 6 Pg 127.

WK. 9: Lesson 6

PROPORTIONS

Proportions are ways of comparing quantities.

Direct proportion

This is a type of proportion in which the two quantities decrease or increase in the same ratio.

Example (price of pens and No. of pens)

The cost of a pen is shs 1500. Find the cost of 5 similar pens

1 pen sh 1500

5 pens 5 x sh 1500

= 1500

x 5

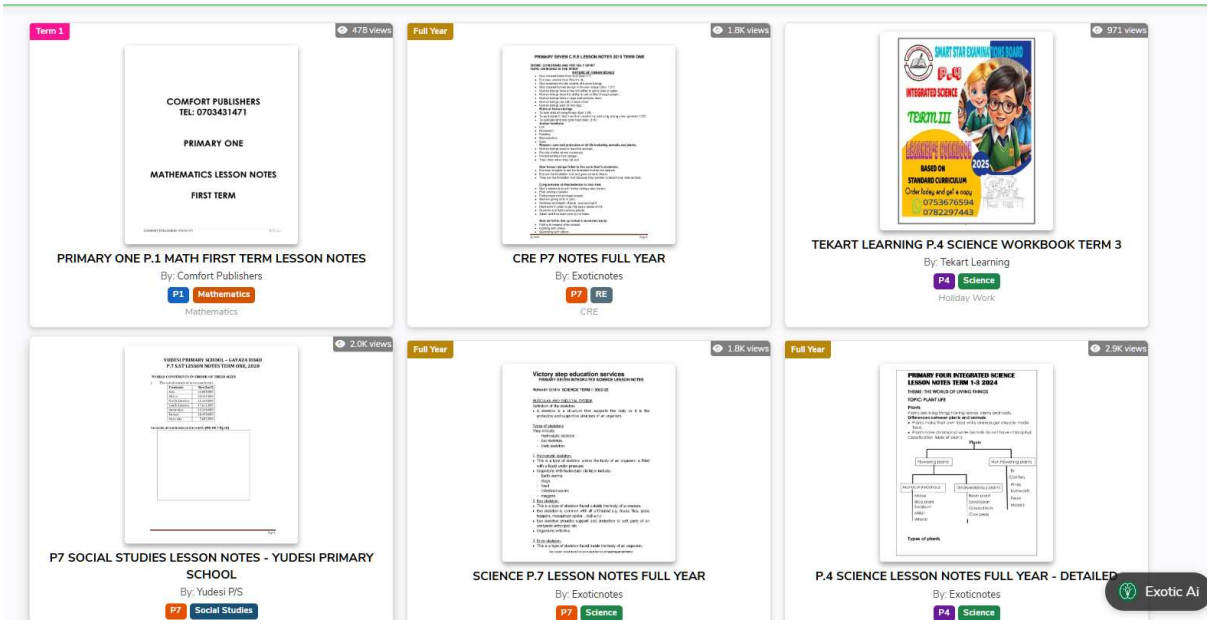

shs 7500

NB:

Always start by finding the equivalence of 1 item.
