

GLORISO EXAMINATIONS BOARD (GEB) – KAMPALA
PRIMARY SCHOOLS JOINT PRE-MOCK EXAMINATIONS, 2025

P.7 INTEGRATED SCIENCE

P.7 SCIENCE PRE-MOCK MARKING GUIDE

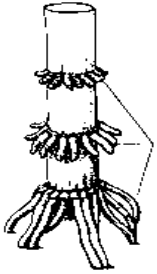

1

1. Biological children
2. Root tubers
3. It enables insects to increase in size or grow.
4. It prevents bad body smell / removes dirt from the body / prevents some skin diseases
5. Presence of warmth / oxygen / moisture / food
6. By feeding children on foods rich in roughages
7. By coiling or curling up.
8. Magnetism can pass through nonmagnetic materials
9. To prevent staining of clothes
10. It leaves the soil bare exposing it to agents of erosion.
11. They prevent water from entering the soil / they lead to soil infertility.
12. Snuffles / ear canker
13. Natural fertilizers are cheaper than artificial fertilizers / natural fertilizers stay longer in the soil than artificial fertilizers
14. Endo skeleton
15. It cools plants
16. To know the number of birds on the farm / to know the expenditure / to know the profit and losses / to plan for the farm
17. When the mother has HIV/AIDS / when the mother has breast cancer / when the mother is very sick / when the mother has wounds on the nipples.

18. Shearing is the removal of wool from sheep.
19. Loss of school education / obstructed labour / difficulty delivery / early marriage / forced marriage
20. It is used to detect the presence of mastitis in milk
21. does not support burning
22. They cannot be recharged / they store electricity for a short time.
23. It leads to barrenness in women / leads to blindness to a newly baby
24. Memory card / flush disc / compact disc / magnetic tape
25. Sunny weather
26. Suckers are used for propagation
27. Fire wood / charcoal / saw dust / wood shaving
28. By coiling the bulb filament
29. Queen bee/ worker bee
30. Monocotyledonous plants
31. Pistil
32. It receives pollen from anthers
33. By conduction.
34. It reduces fats / weigh / makes the body physically fir / makes the joints flexible / makes the ligament and tendon strong / reduces the risk of heart diseases.
35. The liver
36. By biting
37. It prevents contamination of food
38. Broilers
39. It is more dense / denser than water
40. It traps houseflies till death.
41. Get tiny pieces of paper and put them on a table
 - Rub a plastic ruler on your hair several times
 - Put the ruler near the pieces of paper
 - The pieces of paper will be attracted by the ruler.
42. By sinking deeper in milk

- (b) dairy cattle
- (c) to improve the quality of local breeds of cattle.
- (d) by spraying using acaricides / paddock grazing / de-ticking or hand picking ticks.

43.

- (b) They provide extra support to a plant during flowering and fruiting stage
- (c) sugarcane / maize / sorghum / millet
- (d) monocotyledonous plants or monocots

44. It is a source of jobs / people sell rabbits and get money.

- (b) Pneumonia
- (c) rabbits mature faster than cattle / rabbits occupy / smaller space than cattle / rabbits produce more young than cattle.

45. W – rare gases X – nitrogen

- (b) letter Y
- (c) Used during respiration / germination.

46. Water and sanitation / food and nutrition / maternal and child health care / oral and dental health / personal hygiene / immunization / first aid

- (b) prevention is better than cure / PHC activities must be effective / affordable / available / total health for all / every member must participate
- (c) Sweeping classroom / mopping classroom / sweeping the compound / picking rubbish in the compound / boiling water for drinking.

47. Decomposition

- (b) For building / making glasses / filtration of water / cleaning utensils

(c)by adding manure / fertilizers / practicing / crop rotation / mulching / bush fallowing.

48. Sea mammals / marine mammals

(b) sea lion / dolphin seal / porpoise

(c)Both are warm blooded / both undergo internal fertilization / both care for their young ones / undergo sexual reproduction.

49. Pelvic girdle / pelvis

(b)ball and socket joint

(c)reduces friction

(d) long bone.

50. Chemical change

(b)makes metals old / blunt / weaken metals

(c)painting / oiling / making alloys / keeping in cool dry places / greasing.

51. Treating water with chemicals

(b)It reduces the volume of water

(c)covering water / putting water in clean containers

(d) it still contains germs.

52. Tubal ligation / vasectomy

(b) through abstinence

(c)wearing clean under pants / dry under parts / washing sexual organs.

53. Binary fission

(b)bacteria / amoeba

(c) Some fungi are used in baking / fermentation / sold for money / some are eaten / making drugs.

54. Water can be replaced naturally by water cycle

(b) fast flowing water is used to generate hydroelectricity / tides are used to generate tidal energy / hot springs are used in generation of geothermal electricity / steam is used in generation of steam energy.

(c) Fish gets food from water / water is a habitat of fish.

55. Frequency is the number of vibrations per second

(b) by vibration of an object

(c) by loosening the string

(d) percussion musical instrument

END.
