WHY BABIES CAN'T TALK

Long ago, babies were able to speak as soon as they were born. They did not cry when they wanted food, or when they were too hot or too cold or uncomfortable in any way. They just opened their mouths and told their mothers what they wanted. This made it very easy for their mothers to look after them.

One day, a newly-married woman went to the next house to take some burning wood from their fire. She would use this to light her own fire. The owner of the house was not in but her little baby was lying on a mat in the room. The woman ate some meat and hid some in her clothes.

When the baby's mother returned, she asked, 'Who has stolen some of my meat?'. 'Mother, I know the thief, she is the woman in the next house', the baby said. Everybody came and heard the baby's story. They all shouted, 'Thief! Thief' at the woman who had stolen the meat. God the creator heard the story and switched off the baby's voice. Since that time, little babies have been unable to talk.
